

FEATURES

- Integrated Microstepping Drive/Motion Controller with Optional Encoder/NEMA 34 High Torque Motor
- +24 to +75 VDC Input Voltage
- Low Cost
- Extremely Compact
- Available Configurations:
 - Integral Encoder for Closed Loop Control
 - Single Shaft
 - Knob for Manual Positioning
- Three Motor Lengths Available
- Single Supply
- Microstep Resolution up to 51,200 Steps Per Rev
- Open or Optional Closed Loop Control
- Programmable Motor Run and Hold Currents
- Four 5 to 24 VDC I/O Lines
- One 10 Bit Analog Input
- 0 to 5 MHz Step Clock Rate Selectable in .59Hz Increments
- RS-485 Communications with Selectable Baud Rate to 115K
- 62 Software Addresses for Multi-Drop Communications
- Simple 1 to 2 Character Instructions
- 12" (30.5 cm) Flying Lead Interface

DESCRIPTION

The MDrive34 Motion Control offers the system designer a low cost, intelligent motion controller integrated with a NEMA 34 high torque stepping motor and a +24 to +75 volt microstepping drive.

The MDrive34 Motion Control adds a versatile array of functions by combining a complete programmable motion controller with our already compact and cost effective standard MDrive34, adding little cost and no increase in size. Standard offerings include four 5 to 24 volt general purpose I/O lines, one 10 bit analog input, 0 to 5 MHz step clock rate, microstep resolution up to 51,200 steps per revolution, and a full featured easy-to-program instruction set.

The MDrive34 Motion Control communicates over RS-485 which allows for point-to-point or multiple unit configurations utilizing one communication port. Addressing and hardware support up to 62 uniquely addressed units communicating over a single line. Baud rate is selectable from 4,800 to 115K.

The MDrive34 Motion Control is available with optional closed loop control. The closed loop configuration adds a 512 line (2048 edge) encoder with index mark, internal to the MDrive34 without increasing the length of the unit. Functionality increases to add stall detection, position maintenance, and find index mark.

Available motor configurations include: single shaft and a knob for manual positioning. The MDrive34 Motion Control is available in three motor lengths: 24, 31 & 47. Interface connections are accomplished using 12" (30.5 cm) flying leads.

The MDrive34 Motion Control is a compact, powerful and inexpensive solution that will reduce system cost, design and assembly time for a large range of stepping motor applications.
